***Examiner's Statement of Reasons for Allowance***

1. Claims 1-90 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to anticipate or make obvious the claimed invention. Specifically, the prior art fails to teach, in combination with the remaining elements as recited in claims 1, 28, 45, and 66:

The present invention is directed to a multi-resonant double-sided HTS magnetic dipole micro-antenna.

Regarding claims 1, 28, 45, and 66: Prior Art fail to specifically teach that a first YBCO radiating means being configured so that at any one of a plurality half-cycles a first current flow is in phase with a second current flow in said second YBCO radiating means; a discontinuity between said first YBCO radiation means and said second YBCO radiation means causes a plurality of multi-resonant properties; said first YBCO radiation means, said second YBCO radiation means and said LAO substrate provide a decreased surface impedance; and said inductive coupling, said first current flow and said second current flow being in phase, said decreased surface impedance, said circular polarization radiation pattern and said plurality of multi-resonant properties permit a reduced antenna size with an increased antenna efficiency.

Claims 2-27 are allowed for depending on claim 1.

Claims 29-44 are allowed for depending on claim 28.

Claims 46-65 are allowed for depending on claim 45.

Claims 67-90 are allowed for depending on claim 66.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
